Logo usage

The logo may be resized but must not be stretched, rotated or otherwise transformed.

Sufficient white space must be applied to ensure the logo remains distinct and clear.

On dark backgrounds, the white logo is used. On light backgrounds, the coloured or greyscale logo is used.

Avoid using the logo on mid-toned backgrounds. If the logo is used on an image background, sufficient contrast must be ensured.
Typography

Screen fonts

The primary screen font is the Inter family, available from: https://github.com/rsms/inter/releases/latest

Inter is free and crafted for computer and mobile screens, and supports all European character sets (incl. Greek/Cyrillic) across all styles. It is also available as a variable font.

Default
Inter Medium (500)

Body text
Inter Regular (400)

Headings

Heading 1 - Inter Bold (700)
Heading 2 - Inter Bold (700)
Heading 3 - Inter Bold (700)

Fallback font

If the Inter font isn't available, Tahoma can be used as a fallback font. It is available by default on most systems.

Tahoma
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Contrast

Contrast Ratio

Text may be used on coloured backgrounds or images provided sufficient contrast is achieved. For normal text, a minimum contrast ratio of 4.5:1 is required. For headings or large text (18pt/24px), the ratio must be at least 3:1.

Contrast can be checked using online tools such as:

https://webaim.org/resources/contrastchecker/

Website

The website employs most palette colour variants, with blue and purple dominating above-the-fold on the front page followed by other hues.

The various website sections have their own dominant colours, such as green for Training. The colour combinations for the these sections may be used as themes for presentations.

The site is designed for readability, high contrast and usability on desktop as well as mobile and touch devices.
This design guide and accompanying graphic materials are available on the website:
