FUNDING FOR OS PROJECTS

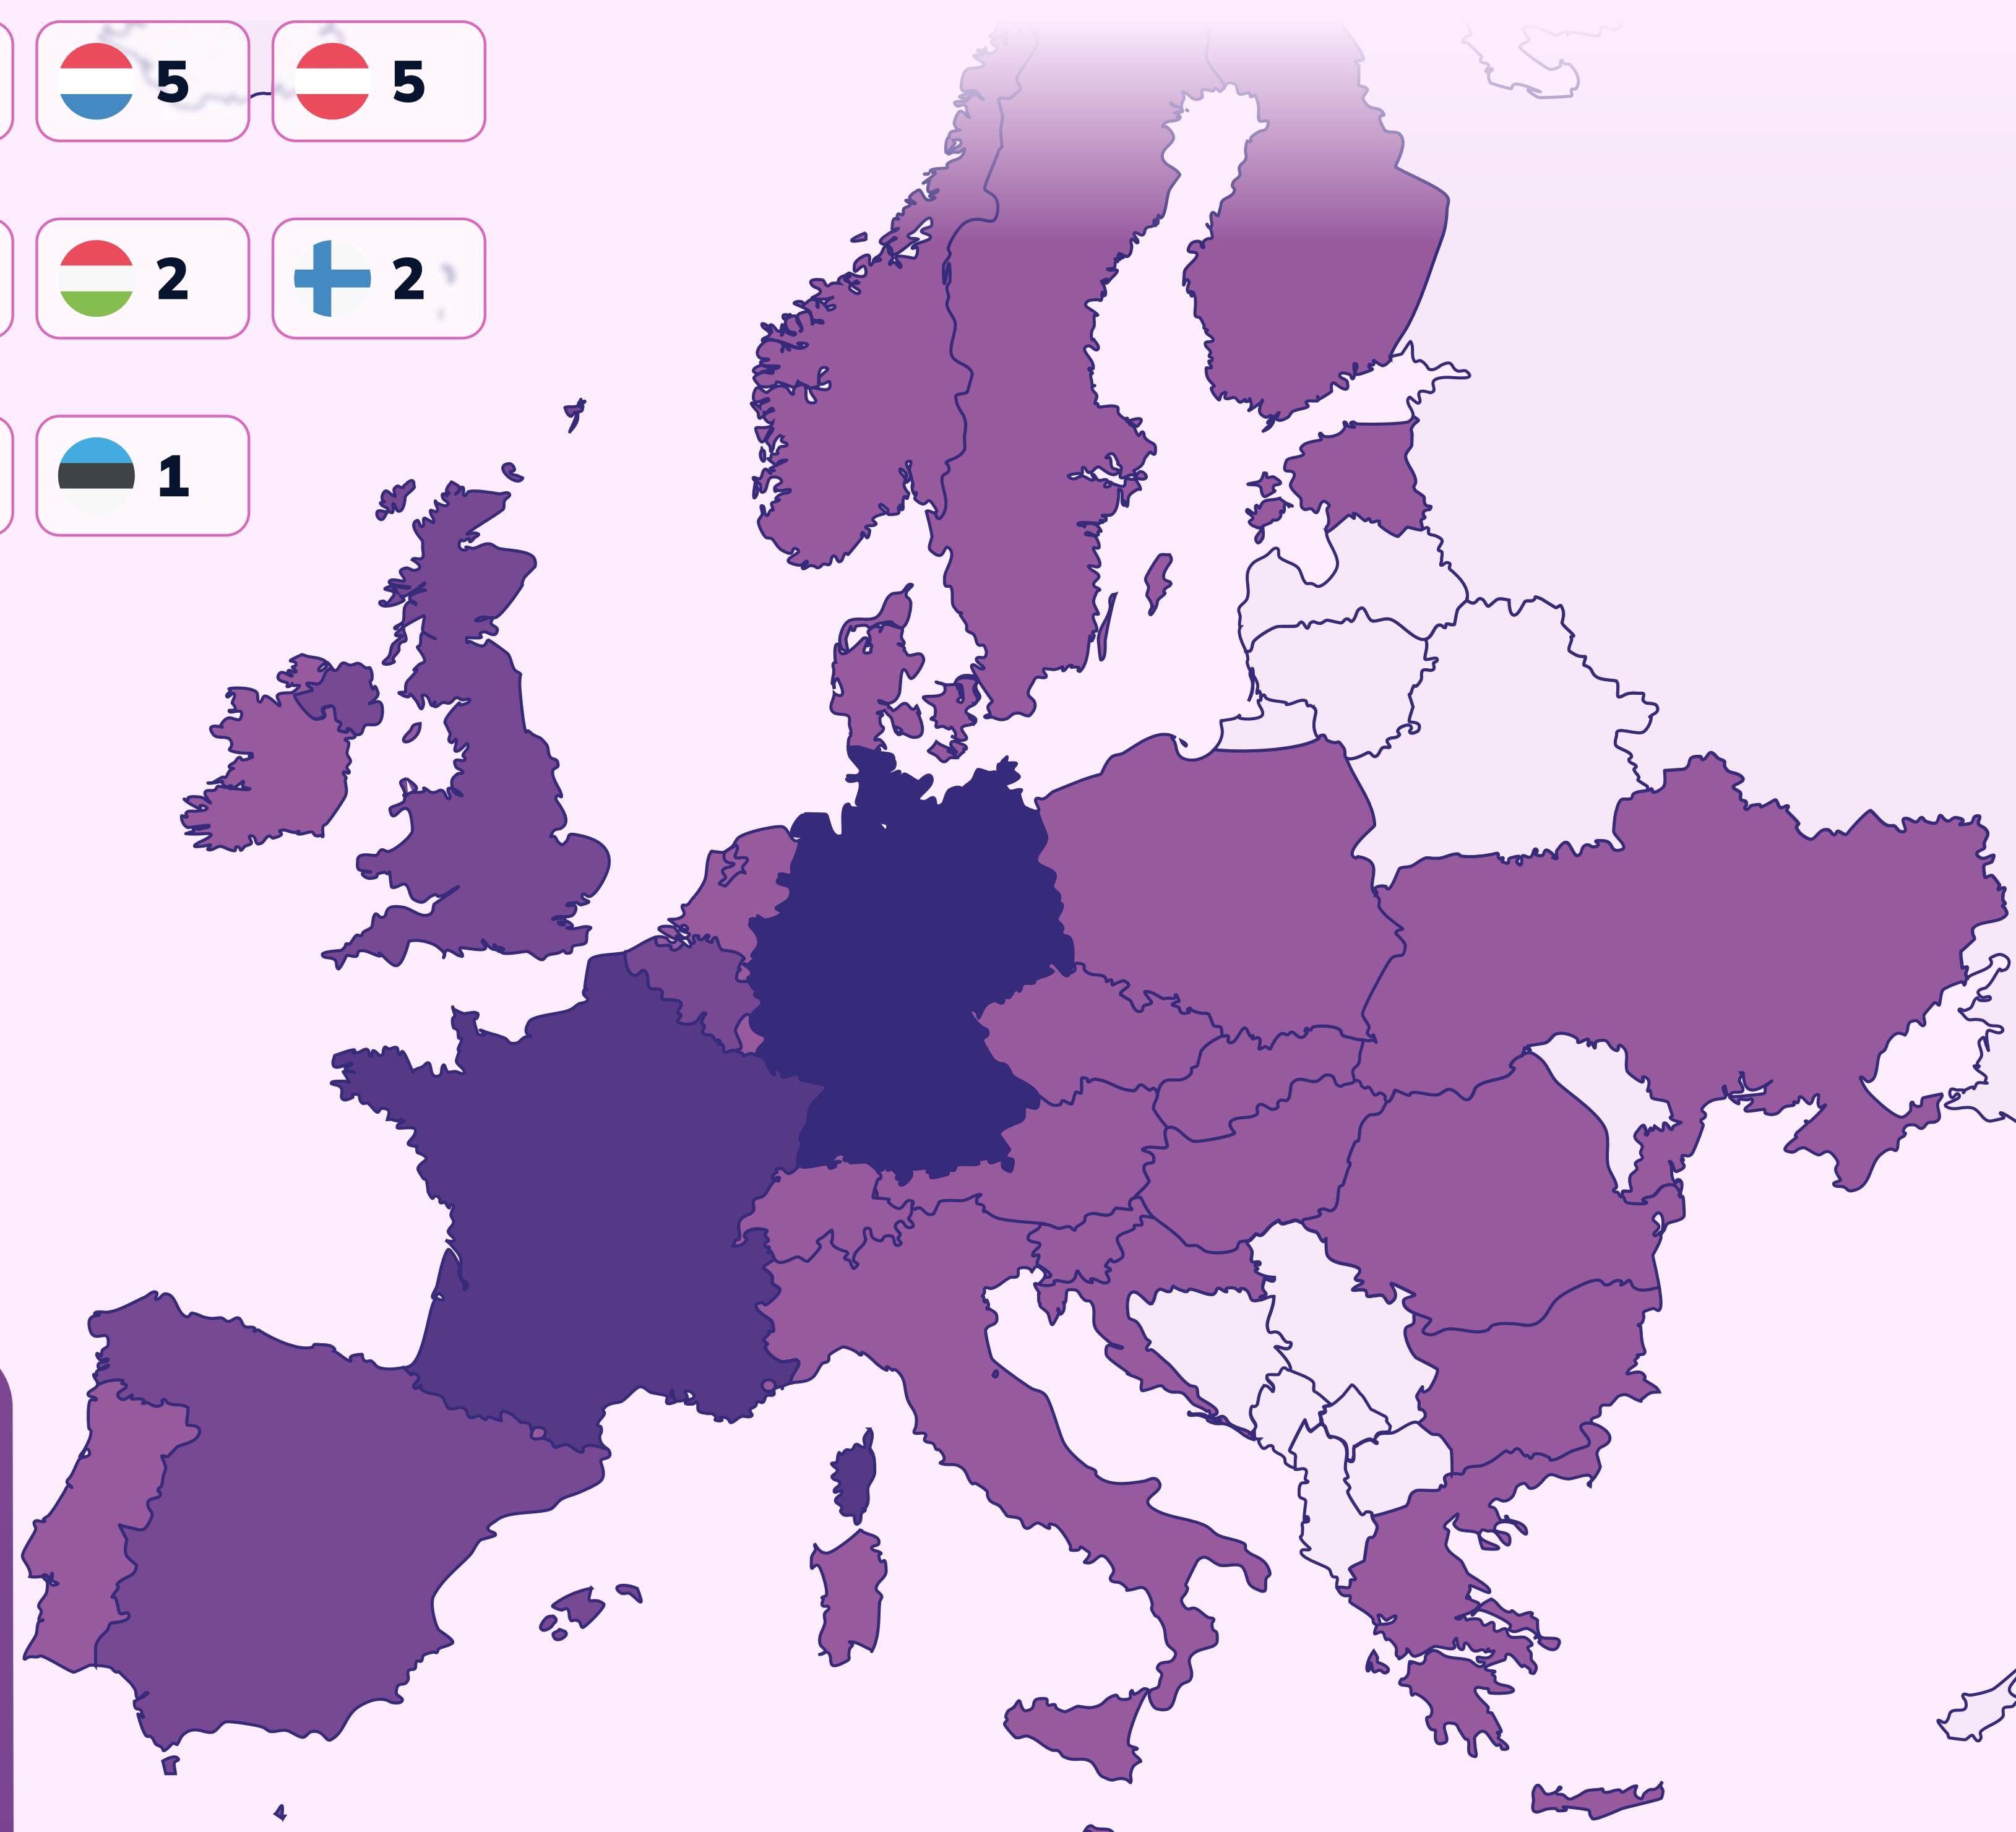

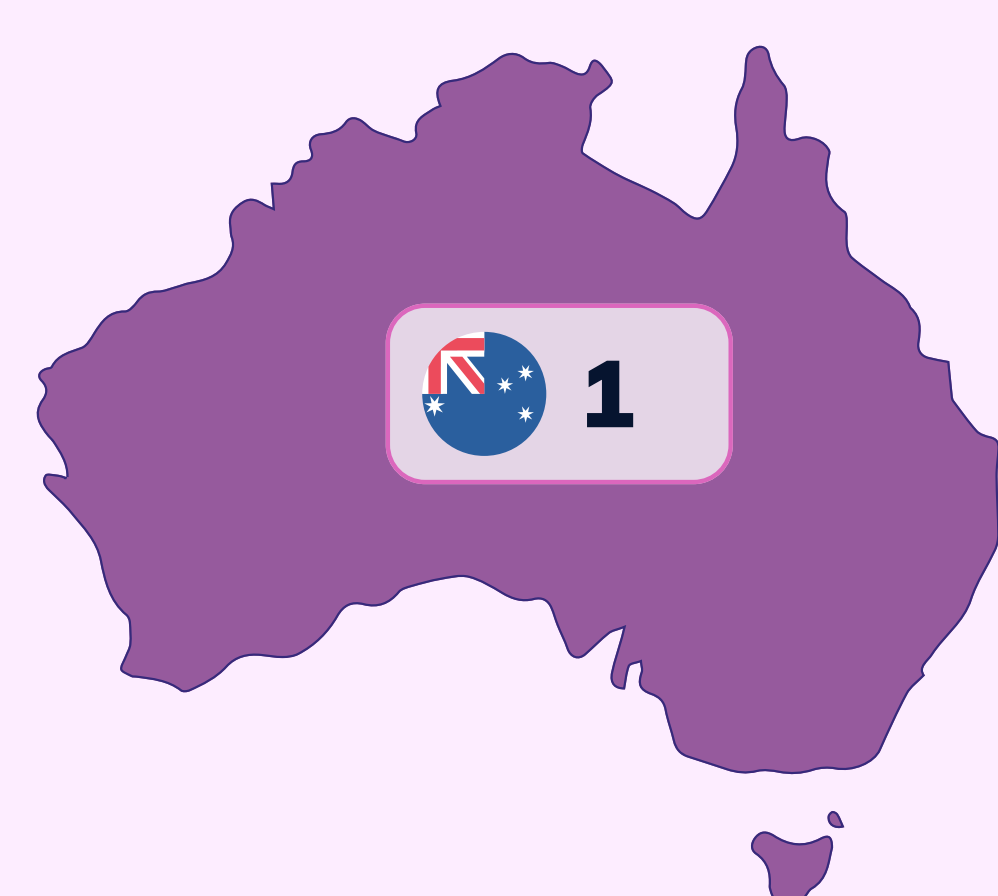

Organisations Involved

Geographic Distribution

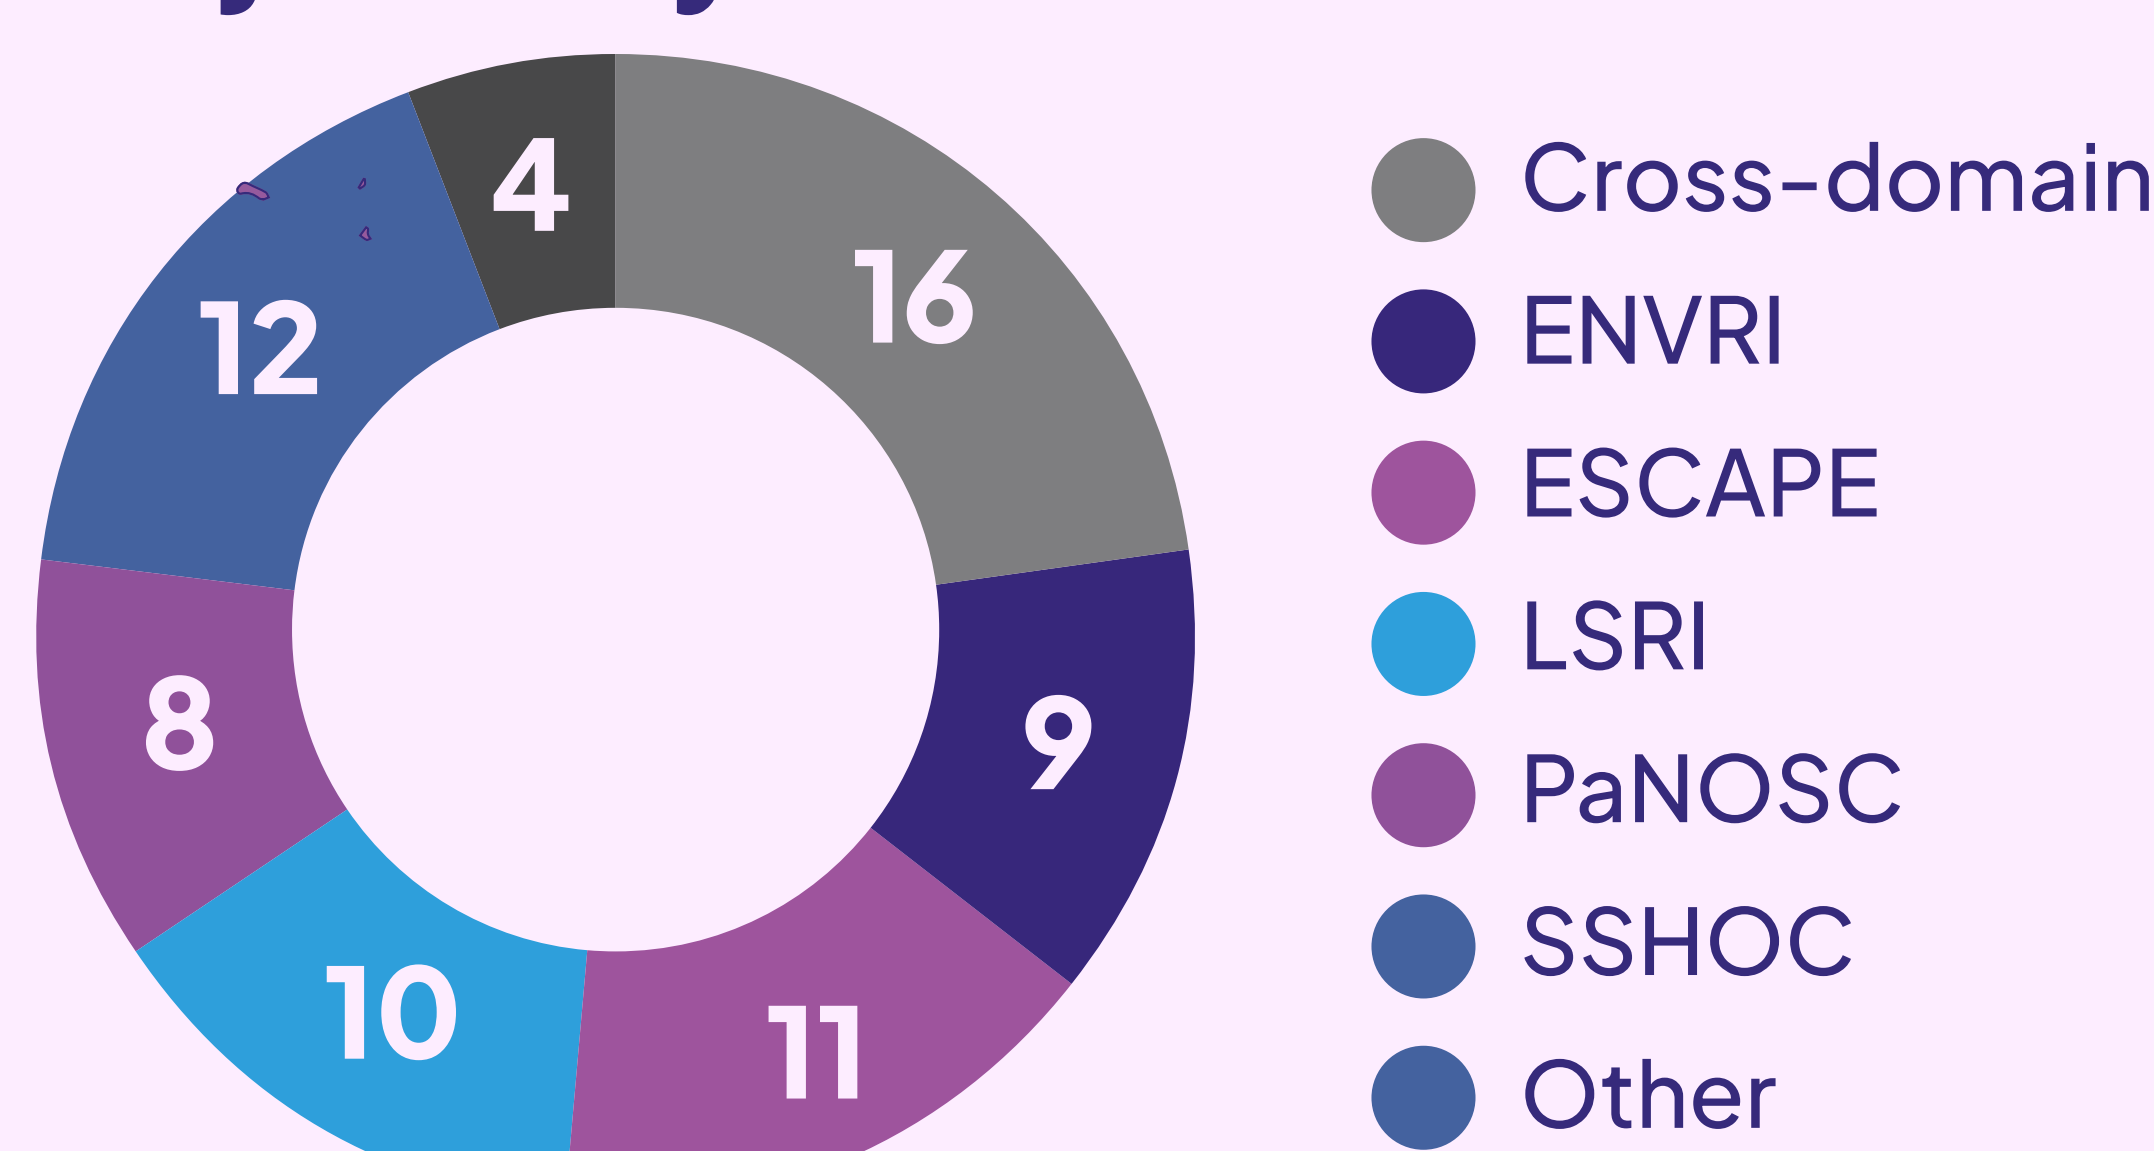

More than **200 organisations** across **28 different countries** have been involved in the OSCARS Open Calls

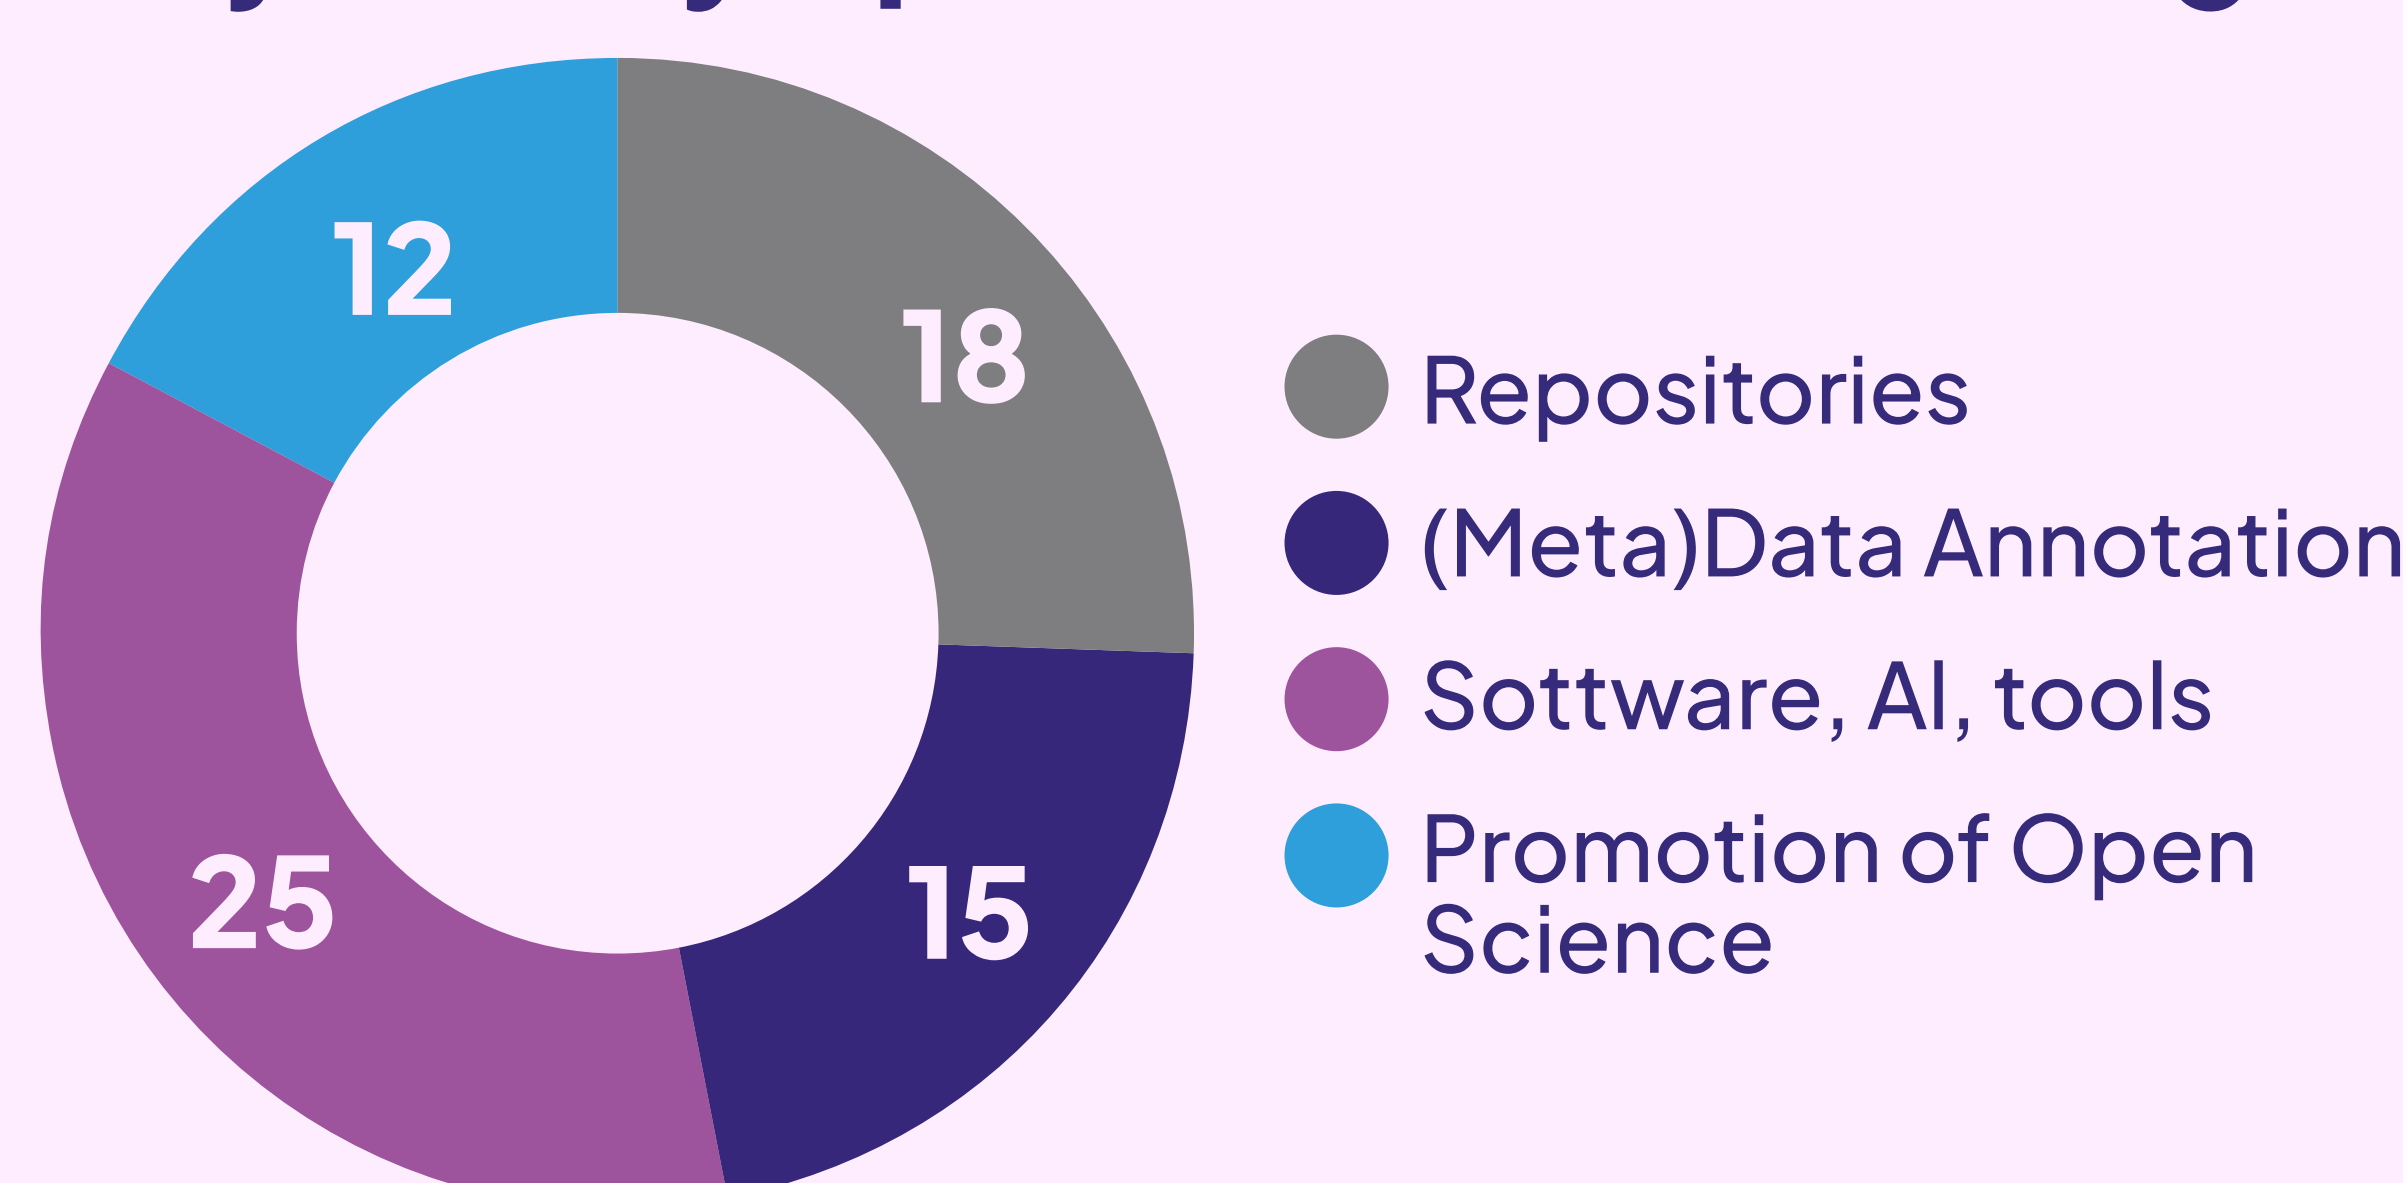

Countries outside of Europe

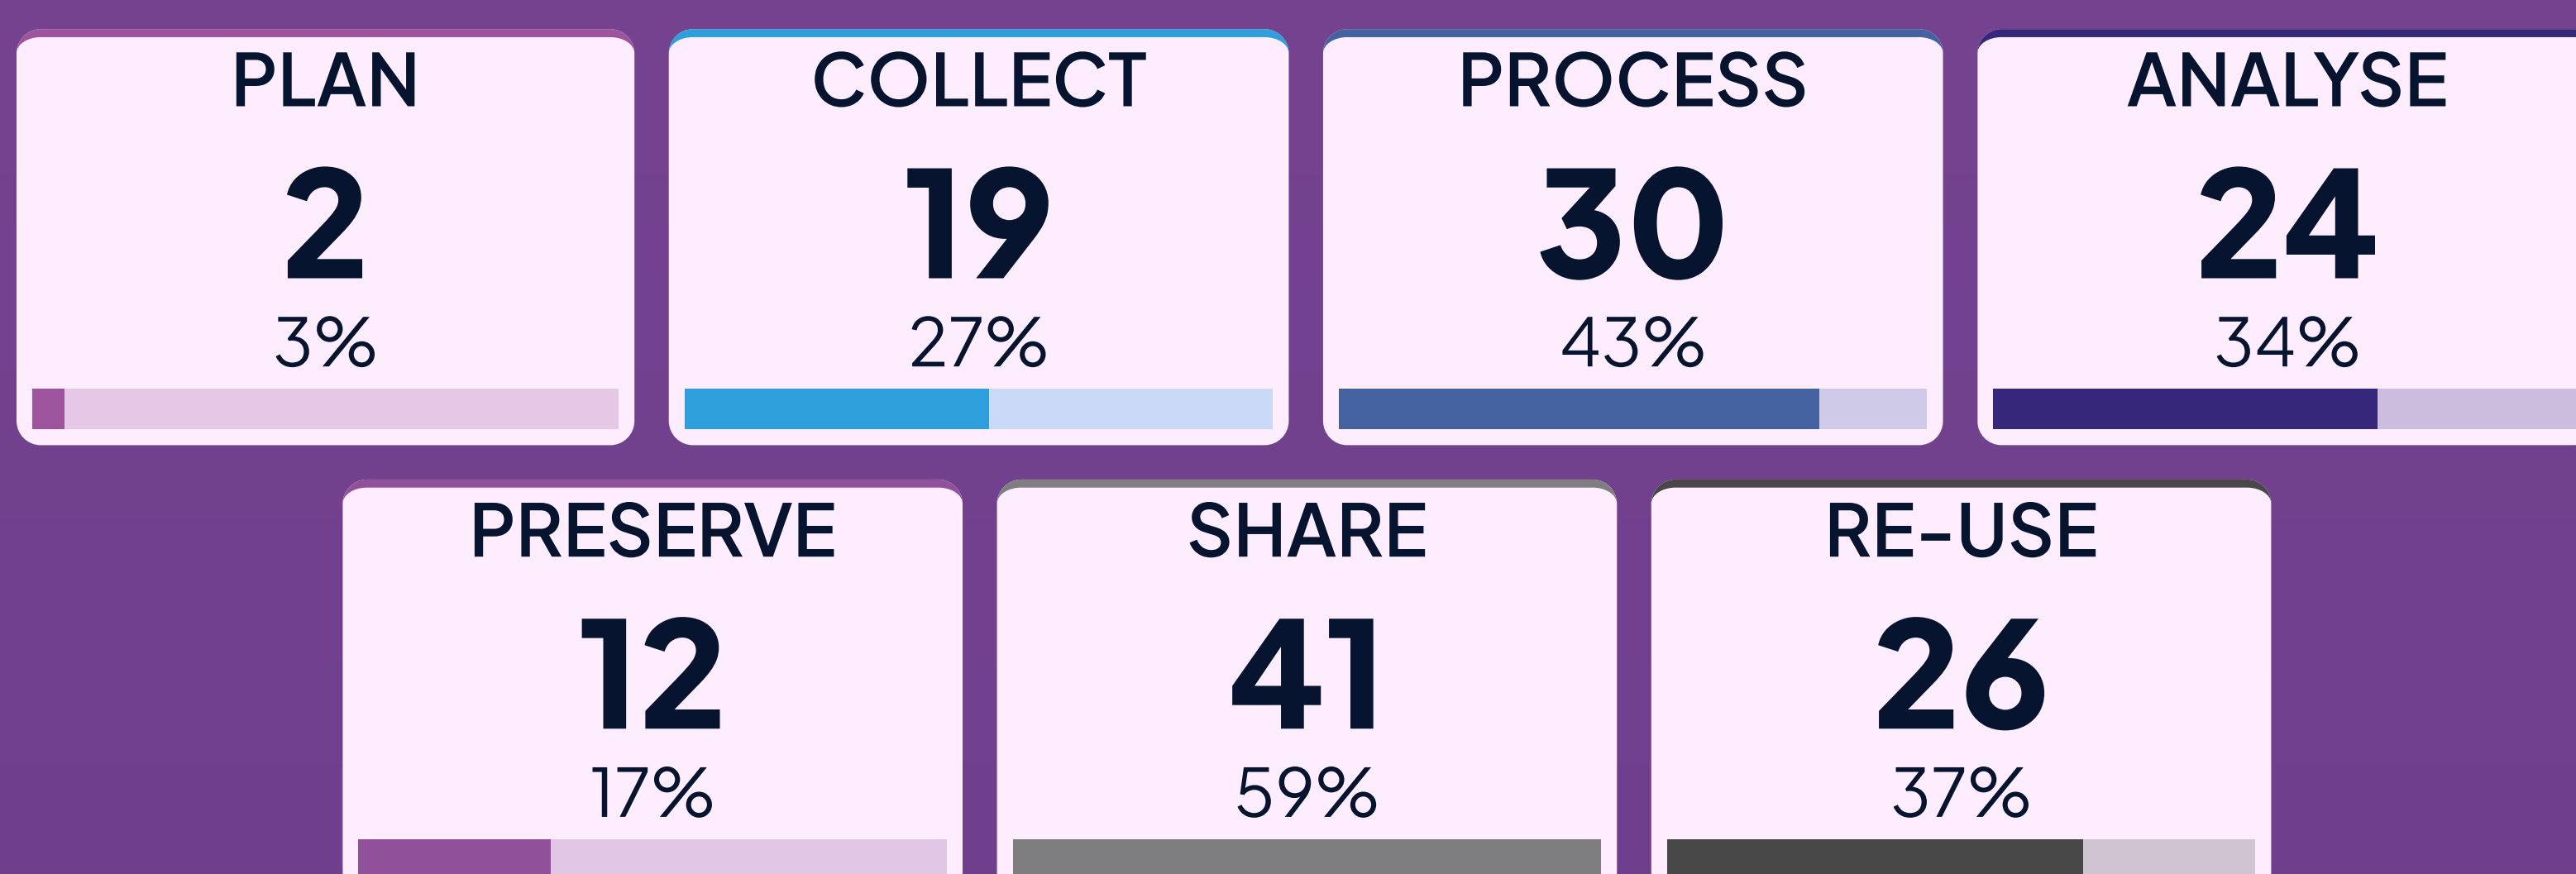

Projects by science cluster

Projects by open science challenge

PROJECTS BY DATA LIFECYCLE STAGE

94 new positions created or existing ones extended
(in total 100 person-years and 2 person-months)

CAPACITY BUILDING Training and engagement tiers

59 of 70 funded projects contribute to training or capacity building

Tier 1 – Training events

Workshops, webinar, schools, hackathons and bootcamps organised or taught by the project.

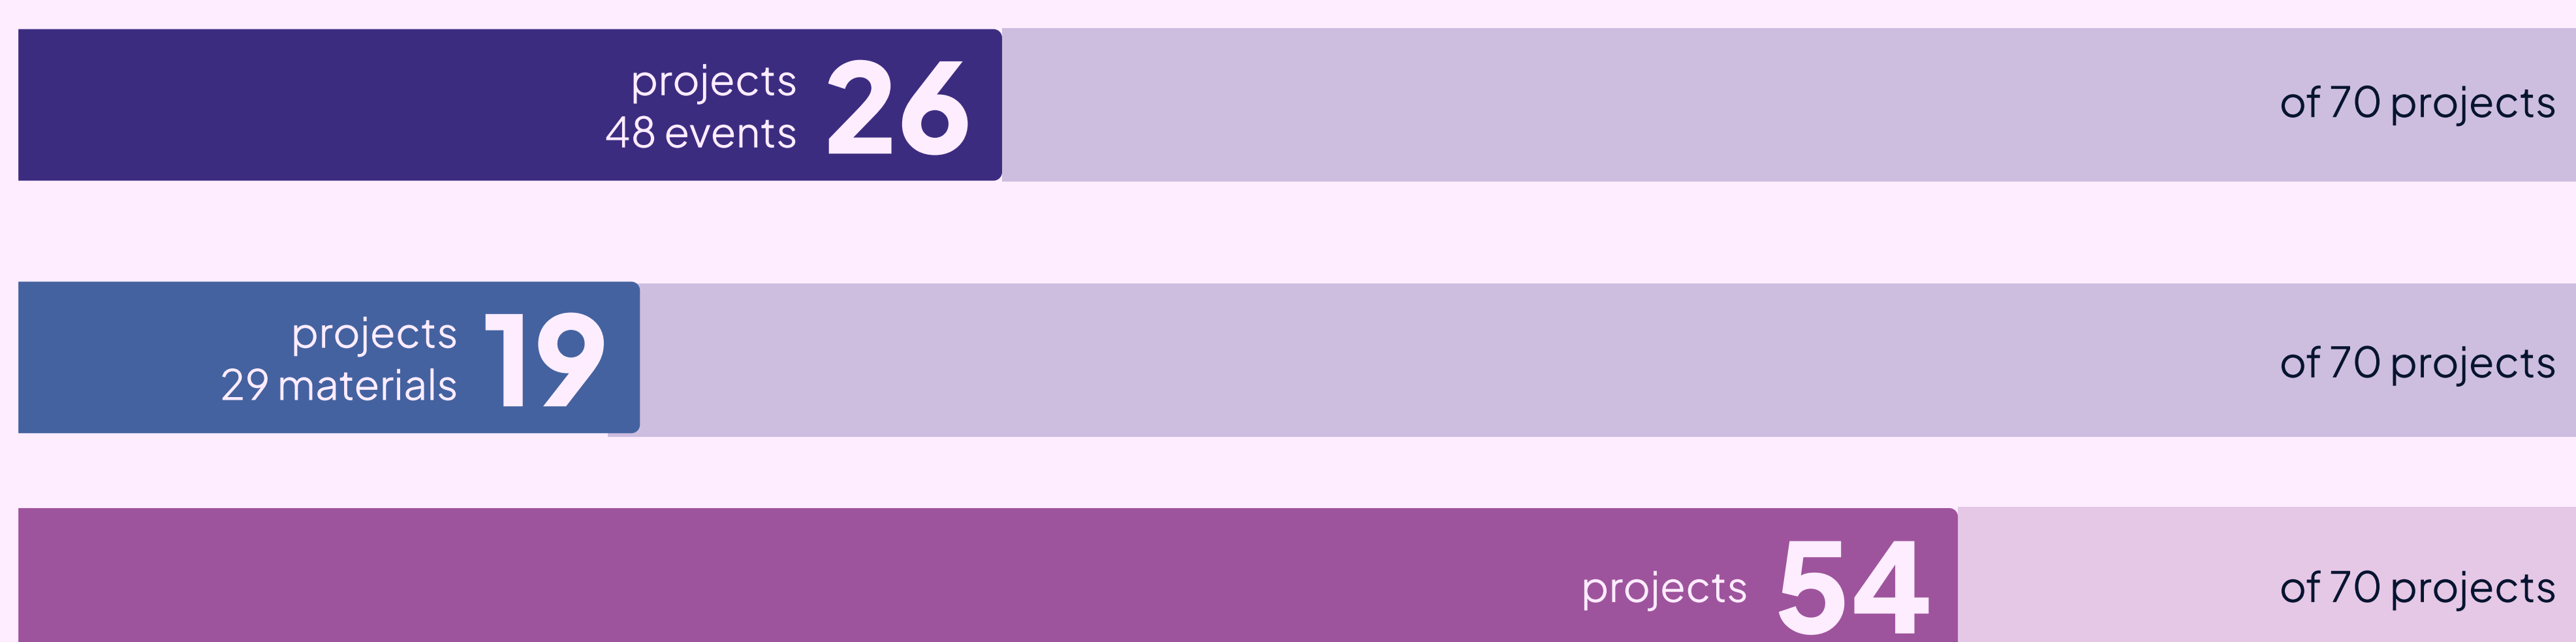

Tier 2 – Training materials

Tutorials, textbooks, teaching notebooks, recorded lectures and user guides.

Tier 3 – Capacity building

New skills and capacities built in the team or community (final survey)

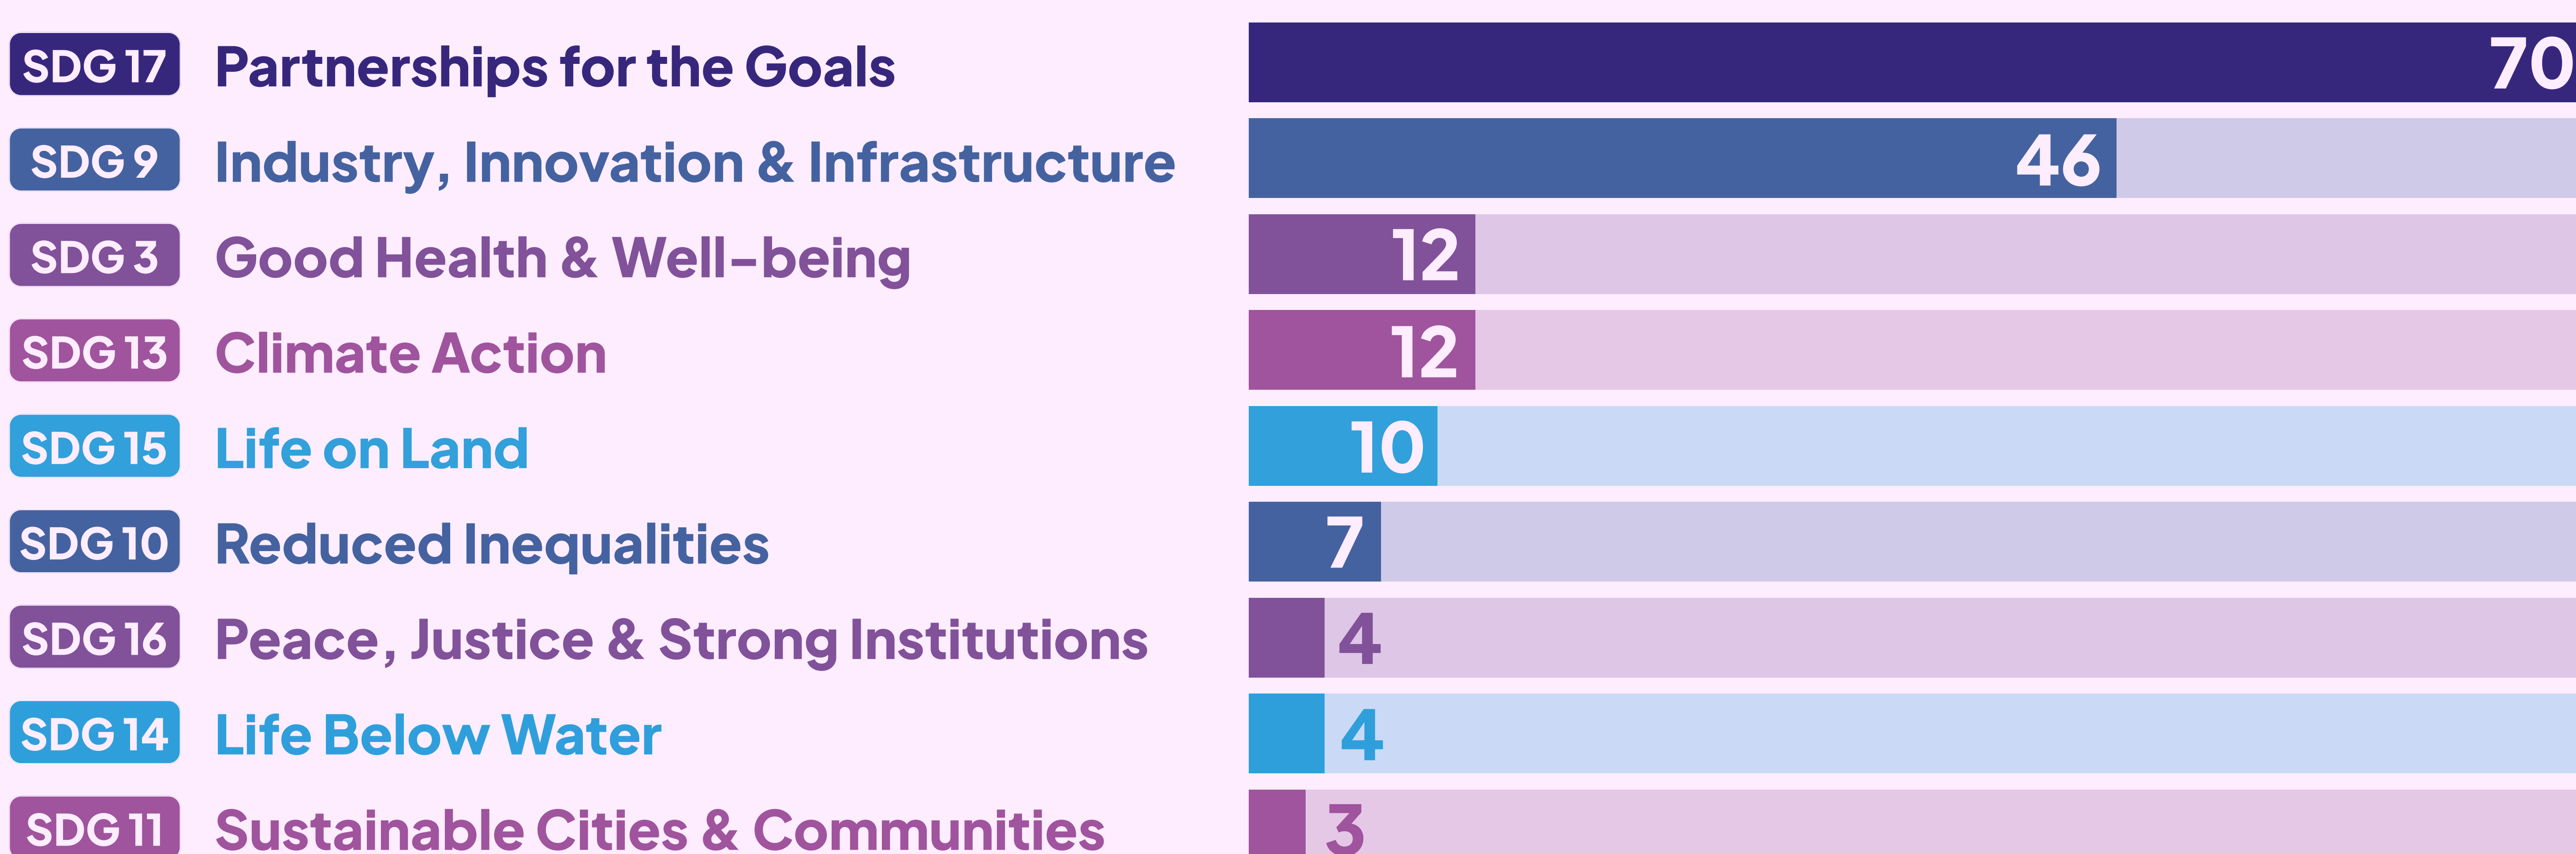

Tiers are not mutually exclusive: 10 projects appear in all three, and the 59 distinct projects are the union of the three tiers. Tier 1 counts training events that the project organised or taught at, including the LabID and OASIS closing workshops scheduled for September–October 2026; talks at conferences and workshops are not counted. Bar length shows the share of the 70 funded projects. Source: OSCARS projects workbook (24 September 2026) and final survey.

CONTRIBUTION TO UN SUSTAINABLE DEVELOPMENT GOALS

SDG alignment of the OSCARS funded portfolio

Number of projects contributing to each SDG - **SDG 17** (Partnerships for the Goals) applies to all **70 projects** as a universal baseline

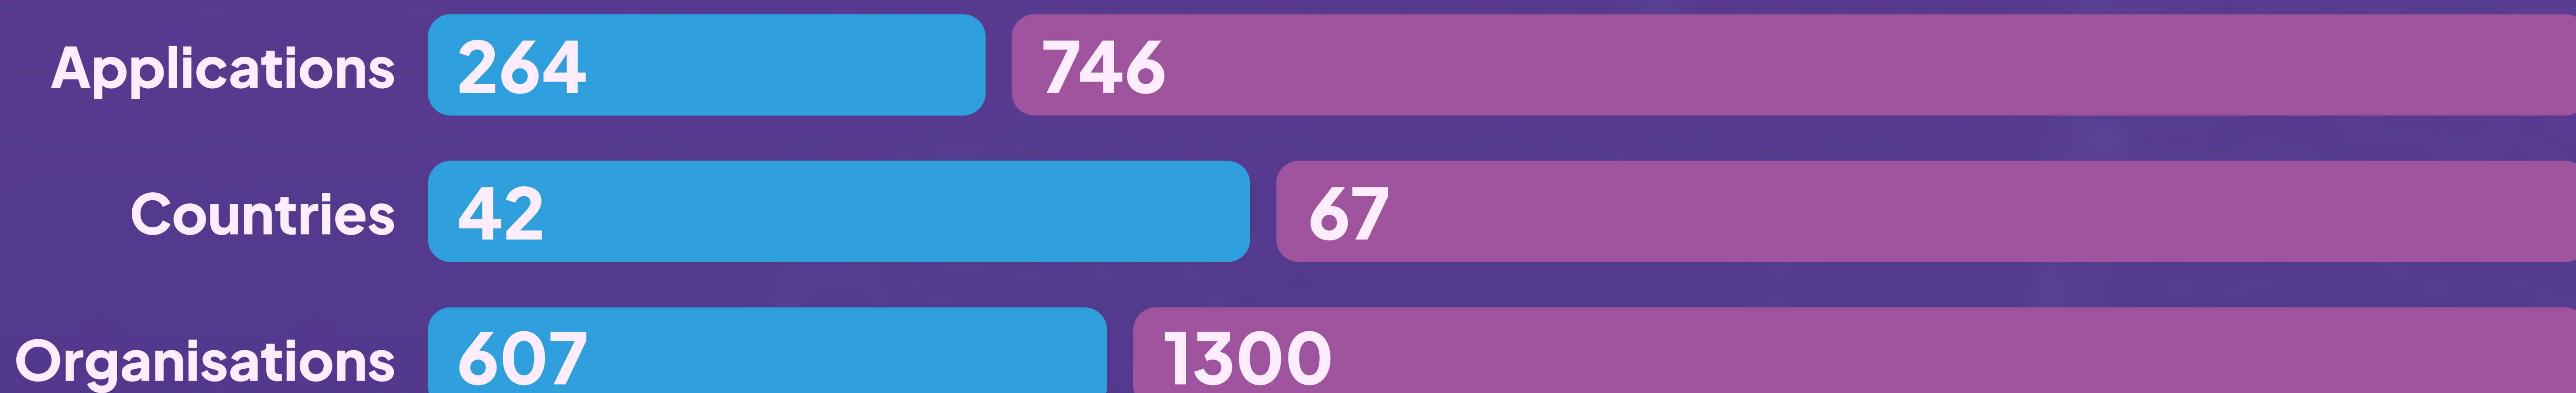

OPEN CALL GROWTH

Scale comparison: 1st vs 2nd Open Call

Applications nearly tripled between OC1 and OC2—a strong signal of growing community confidence in the OSCARS model

1st Open Call 2nd Open Call
