# What could work well?

## Active learning:

- Making processes visible
- Directly experiencing methods
- Critical reflection on practice
- Practical tasks and exercises
- Developing an own DMP, consent form
- Group discussions of real-case challenges

# Our experience

- Mixed audience can get the discussion going
- Different learning goals – different teaching form
- Engage the audience
- Lunch or snack and coffee breaks are important
- Plan ahead but be flexible
- Try to use group work and/or live polling
- Try to assess the room set-up beforehand
- More than one presenter/organizer

# Thank you
